

# Letters to the Editors

**Thanks to the ‘anonymous’ person who sent in the very first letter to the editor. Its great to see your contribution.**

**In response I would just like to re-emphasise the dangers of ‘planking’ and its effects on ordinary people displayed in the picture to the right. It is highly tempting and should be avoided at all times where cameras are operating.**

**KEEP THE LETTERS COMING!!**

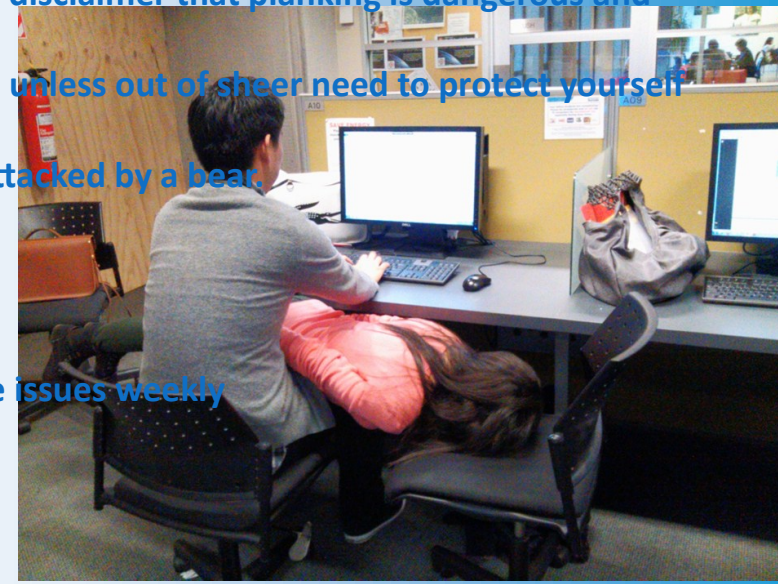

## Amnesia is a Bitch

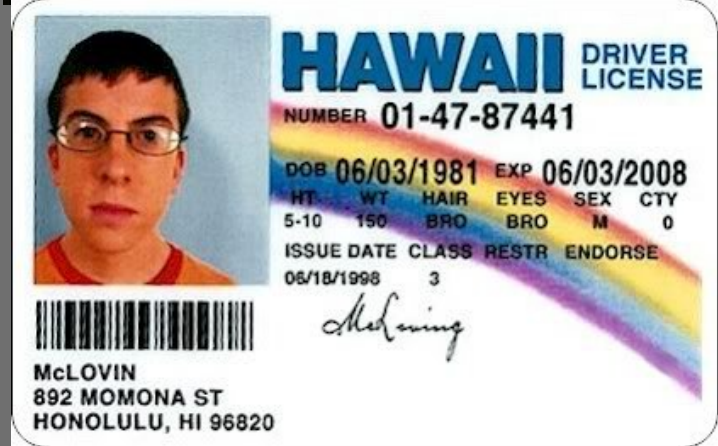

In response to the previous script I would like to say that the attempted planking was more of a momentary response to show the rivals across the error of their ways and showing them the correct way to do what the monkeys do. However it has come to my attention that planking also has serious side-effects such as amnesia either temporary or permanent. This rare side – effect that affects 1 in 10 “planks” has seemed to affect one of the fellow publishers of the script and so to jolt your memory I have attached some photo evidence to the mix. I hope this fills up any black holes in your memory.

I would also like to add a disclaimer that planking is dangerous and should not be conducted unless out of sheer need to protect yourself in situations e.g. being attacked by a bear.

Solid

p.s. you should run these issues weekly

# NERD 2<sup>2</sup> LIFE

APSA PRESENTS

## PUB CRAWL II
